

MEDICAL FORM

APPLICATION FOR CARRIAGE OF PASSENGER ON A STRETCHER

Detailed Medical Certificate must accompany this completed form for approval from AirAsia India Medical Department.

AirAsia India does not provide oxygen and oxygen cannot be carried by passenger travelling on a stretcher.

STRETCHER CASE

Guest last name : _____

Guest first name : _____

ID / Passport No : _____

AirAsia India Flight No: _____ Date : _____

Departure Station : _____

Arrival Station : _____

Permanent Address : _____

Departure contact telephone no. : _____

Arrival contact telephone no. : _____

MEDICAL DETAILS – TO BE COMPLETED BY PASSENGERS’S TREATING DOCTOR:

1) Doctor’s Name, Address, Tel / Fax No, Qualifications, Registration No

2) Patients’ Name : _____ Sex: _____ Age: _____

3) Diagnosis & Date of onset of illness : _____

4) Is the disease contagious or infectious in any form? Yes / No

5) a) Present Symptoms _____

b) Prognosis during flight _____

6) Vital Parameters (Pulse, BP, Temperature, Respiratory rate, Level of Consciousness)

• Normal / Abnormal (Please Specify) _____

7) Dyspnoea

Nil / On Accustomed Exertion / At Rest

8) Details of ongoing medical treatment / any special comments regarding treatment on flight

9) Does patient have full control of bowels / bladder? Yes / No

10) Can patient eat / drink unaided? Yes / No

11) Can patient use aircraft toilet unaided? Yes / No

12) Does patient require wheelchair? Yes / No

If yes which of the following

- a) To aircraft steps
- b) To the cabin door
- c) To seat

13) Does patient require Doctor/Qualified Nurse/Non-Medical Escort? Yes / No

14) Is patient accompanied? Yes/ No

If Yes, by whom _____

(Accompany details: Name/Contact):

15) Have arrangements for Ambulance / Hospitalization made at departure/arrival airports?

If yes, give details _____

Have above details been specified to passenger? Yes / No

PASSENGER DECLARED FIT TO FLY

SIGNATURE: _____ **STAMP:** _____ **DATE:** _____

Note: 1) The attendant should ensure that all items / medical equipment brought on to the aircraft by the patient (needles, syringes, and unused medications) are removed at the time the patient disembarks from the aircraft.

GUIDELINES FOR ASSESSING PATIENT'S FITNESS FOR TRAVEL ON AirAsia India

When assessing a patient's fitness for air travel, the effects of reduced atmospheric pressure and consequent reduction in oxygen tension must be considered. Even in pressurized aircraft the cabin pressure will be equivalent to an altitude of 5000-7000feet. Although each case will be considered on its merit, the following conditions are generally considered unacceptable for air travel:

- a) Critical heart and respiratory conditions (e.g. decompensated cardiac patients / patients with severe valvular disease / unstable angina / severe asthma) are usually not permitted to fly. Patients with recent coronary occlusion with myocardial infarction are not normally permitted to fly within 6weeks of onset.
- b) Introduction of air into body cavities for diagnostic / therapeutic purposes within 7days of travel.
- c) Mental illness without escort / sedation.
- d) Severe cases of otitis media / sinusitis.
- e) Acute contagious / communicable diseases.
- f) Fractures of the mandible with fixed wiring of the jaws.
- g) Uncontrolled severe hypertension / diabetes mellitus with or without complications. h) Peptic ulceration with haemorrhage within 3weeks of travel , except when permitted by the treating consultant.
- i) Post – Operative cases within i) 10days of abdominal operations.
 - ii) 21days of chest surgery.
- j) Pregnancy beyond 34 weeks, postpartum females & new-borns in the first week.
- k) Patients with deep vein thrombosis (DVT) should not fly till patient is stabilized on anticoagulant therapy and there are no pulmonary complications. Passengers with risk factors for developing DVT should carry fitness certificates from the treating doctor.
- l) Patients with severe anaemia (HB < 8.5 gm / dl) are not permitted to fly. However in exceptional cases, they may be permitted to fly with a specialist's certificate.
- m) Patients in acute phase of cerebral infarction (stroke) of any etiology are generally not permitted to fly within 3 weeks of onset.

Please Note:

- 1) Cabin attendants are trained in basic First Aid only and are not expected to render special nursing care to critically ill cases. First Aid Kits carried on-board the aircraft do not contain syringes, special drugs or instruments. Cabin attendants are not permitted to administer injections or open Physician's kits, which contain life-saving drugs / equipment that can be opened only under instructions of Registered Medical Practitioners.
- 2) Patients with intravenous (iv) drips are not allowed to fly unless they go as stretcher cases as there is no provision for IV drips stands onboard the aircraft. All cases on intravenous drips must be accompanied by a qualified nurse / doctor.
- 3) Any fee for the completion of this certificate or for further medical examination requested by AirAsia India doctors for purpose of certification will be the responsibility of the patient.
- 4) Due to security reasons, personal oxygen cylinders, oxygen concentrators, etc. will not be carried on board the aircraft. Any electronic medical equipment requires clearance by Engineering & Security before it can be carried on board the aircraft.
- 5) All medical details requested must be completed and submitted at least 24-48hrs in advance of the flight. Clearance must be received from the company doctors. The form should be accurately completed and clearly typed. This form is transmitted by fax, so all medical terms should be legible and completed in black ink.
- 6) The AirAsia India doctor's decision regarding fitness of the patient to fly or the requirement of medical escort will be final. If at the time of embarkation the condition of the patient deteriorates carriage may be refused. Any case which

AirAsia India feels might jeopardize the safety or operation of the aircraft will not be accepted. Patients with symptoms likely to cause distress or inconvenience to other customers will not be accepted.
